

Student Name: tiki tiki phont

Assignment:

Notes:

Project Name: Thingy to add to github

Project Type: Python

Date: Fri Jul 31 2026

```

1  #region VEXcode Generated Robot Configuration
2  from vex import *
3  import urandom
4  import math
5
6  # Brain should be defined by default
7  brain=Brain()
8
9  # Robot configuration code
10
11
12  # wait for rotation sensor to fully initialize
13  wait(30, MSEC)
14
15
16  # Make random actually random
17  def initializeRandomSeed():
18      wait(100, MSEC)
19      random = brain.battery.voltage(MV) + brain.battery.current(CurrentUnits.AM
P) * 100 + brain.timer.system_high_res()
20      urandom.seed(int(random))
21
22  # Set random seed
23  initializeRandomSeed()
24
25
26  def play_vexcode_sound(sound_name):
27      # Helper to make playing sounds from the V5 in VEXcode easier and
28      # keeps the code cleaner by making it clear what is happening.
29      print("VEXPlaySound:" + sound_name)
30      wait(5, MSEC)
31
32  # add a small delay to make sure we don't print in the middle of the REPL header
33  wait(200, MSEC)
34  # clear the console to make sure we don't have the REPL in the console
35  print("\033[2J")
36
37  #endregion VEXcode Generated Robot Configuration
